El derecho ante la disrupción tecnológica: Inteligencia artificial, automatización y nuevos paradigmas

In my condition of founding director of the journal, whose first print edition was published in May 2004, it is a great pleasure for me to launch, on the occasion of the XXXVII Anniversary of the Establishment of the Faculty of Law and Political Sciences of the Universidad de Huánuco, Volume 3, Issue 1, corresponding to the year 2026, of the *Revista jurídica peruana Desafíos in its digital version*. The purpose of this journal is to serve as a space for the dissemination and discussion of various legal works and studies, as well as studies on politics, carried out by national and foreign authors and institutions.

For this edition, we have articles by foreign authors, such as María Isabel Puente Gallegos (University of Valencia, Spain), with the work entitled “Research Ethics: Gender in the Process of Democratizing the Exercise of the Human Right to Science in Mexico,” and Jesús Aguilera Durán (Autonomous University of Guerrero, Mexico), with the article “Reconfiguring the Right to Education in the Face of the Disruption of Artificial Intelligence.”

Regarding national contributions, we have Iván Andy Ullauri Ocampo (Public Prosecutor's Office—Office of the Attorney General), with the article entitled “Challenges of Law in the Era of Artificial Intelligence and Legal Automation”; Kiara Nicole Campos Alcalá, Adeli Naomi García Ávila, and Mery Claudia Guerra Guzmán (Universidad Privada del Norte, Lima), with the work “Politicization of the Peruvian Constitutional Court: Effects on Constitutional Review”; Jhon Edwin Cruz Rojas and Neiser Jhonel Rubio Gálvez (Universidad Privada del Norte, Trujillo), with “Overview of Environmental Crimes in Latin America over the Last Five Years: A Systematic Review”; Wilmer Cristian Cruz Suyo (Universidad Nacional Amazónica de Madre de Dios), with “Law No. 30364 in Southern Peru: Comparative Analysis of Its Application in Arequipa and Tacna, 2021–2025”; and Gonzalo David Calderón Enco (Universidad César Vallejo, Trujillo), with the article entitled “Impact of Artificial Intelligence on Latin American Criminal Proceedings over the Last Five Years”.

This continuity toward achieving the journal's indexing in DOAJ (Directory of Open Access Journals), DORA (San Francisco Declaration on Research Assessment), COPE (Committee on Publication Ethics), Latindex, CLASE (Citas Latinoamericanas en Ciencias Sociales y

Humanidades), BASE (Bielefeld Academic Search Engine), Google Scholar, and LatinREV (Latin American Network of Academic Journals in Social Sciences and Humanities) is due to the unconditional support of our Rector, Dr. José Antonio Beraún Barrantes; the Vice Rector for Research, Dr. Uladislao Zevallos Acosta; and the Dean of the Faculty of Law and Political Sciences, Dr. Fernando Corcino Barrueta, as well as the Head of Publishing, Eng. Henry Lozano Cajas, and the Editorial Assistant, Jhenifer Carmen Céspedes Espinoza. With this team, through the Miguel Polaino Navarrete Institute—which I chair—we will continue the process of cataloging and inclusion in other international databases, for greater indexing (WoS, SciELO, and Scopus).
